Furia Ninja

Milestone 3 review report: Supporter sync and final review

Delivered for client review. Milestone 3 is not closed until you have reviewed and accepted it.

What changed since the last report

You sent the missing Supporter material: 79 Supporter cards, the English and Spanish text of 63 of them, and your confirmed changes. Everything you sent is now in the application. No ninja was created twice: the database still holds 177 ninjas, and the Supporters filled in records that only had a name and a release month.

Measure	Before	Now
Ninjas in the database	177	177 (none added, none duplicated)
Supporter cards loaded	16	79
Ninjas with a full card	113	175
Ninjas with English ability text	115	177
Ninjas with complete Spanish text	112	174 (one partial, two without)
Ninjas with name and date only	61	0
Awakening stages	69	120, on 92 ninjas
Awakenings with a stated rule	4	7
Effect rows	2,781	4,395

Your confirmed decisions

Your decision	How it is applied
Natsu Dragneel: talent level 2 replaces level 1	Stored with the quoted source line. Level 1 stays separate
Natsu Dragneel: skill awakening replaces the base target and growth rate	All enemies 330% becomes one random enemy 550%. The other effects of the skill stay
Cursed Tayuya: special card awakening	Speed 88% to 92% and the other restated values replace the base values. Nothing is added twice
Assaulter and Center are one position	Unchanged. The card keeps its own label
English is the original	Spanish never replaces English. It only fills a base number the English leaves out (25 lines)
Power is Constitution, S. Attack is its own statistic	Nine cards print Power and keep it. S. Attack is never mixed with Strategy Attack
All other awakenings	Stacking unknown, shown separately, never added together

Source sync

Every source entry is traceable in the ledger files delivered with this report. The table counts what was supplied and what became of it.

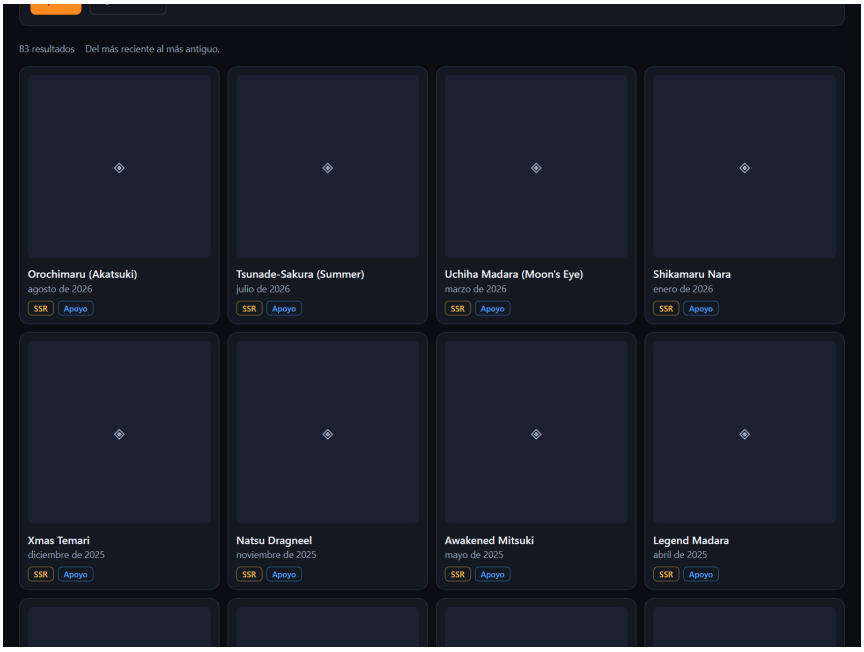

Source	Supplied	Imported	Result
Supporter cards 1 to 16 (earlier)	16 cards, English and Spanish	16	Unchanged
Supporter cards 17 to 79 (new)	63 cards images	63	All read from the images; 63 existing ninjas filled in; 0 created
English and Spanish text of the new cards	63 files	63	62 complete; Kimono Kurenai Spanish stops early (not invented)
Vanguards, Center, Alien, awakening channel	unchanged	unchanged	No change
Equipment, jewelry, gems	nothing	0	Built and tested with test data only

The 79 cards, matched to ninjas

Group	Cards	What happened
Name equals the release list	56 + 16 earlier	Linked to the ninja with that name
Same name apart from spacing (Indra & Ashura)	1	Linked and marked verified
Name differs, matched by judgement	6	Linked, marked for you to confirm: Uchiha Sakura = Sakura Uchiha, 6-tail Utakata = Utakata, Terumi Mei (Summer) = Terumi Mei, Neji Hyuga = Hyuga Neji, Orochimaru (New Era) = Orochimaru from Boruto, Susanoo Itachi & Sasuke = Susano Itachi&Sasuke;
Existing record enriched	2	Yasaka Itachi (now has card, rating and Spanish) and Madara (Moon's Eye) (now has its text). Still one record each
Chinese cards	16	Rating, type and formation matched by position and marked as partly confirmed. Names are not translated
Cards that print Power	5 new	Yasaka Itachi, Reanimated Hiruzen, Sasuke & Itachi, Pain & Konan, Xmas Haku. Stored as Power

The 177 ninjas, one row each, are in MILESTONE_3_DATA_RECONCILIATION.csv. The 79 cards with file, hash and status are in MILESTONE_3_SUPPORTER_SYNC_AUDIT.csv.

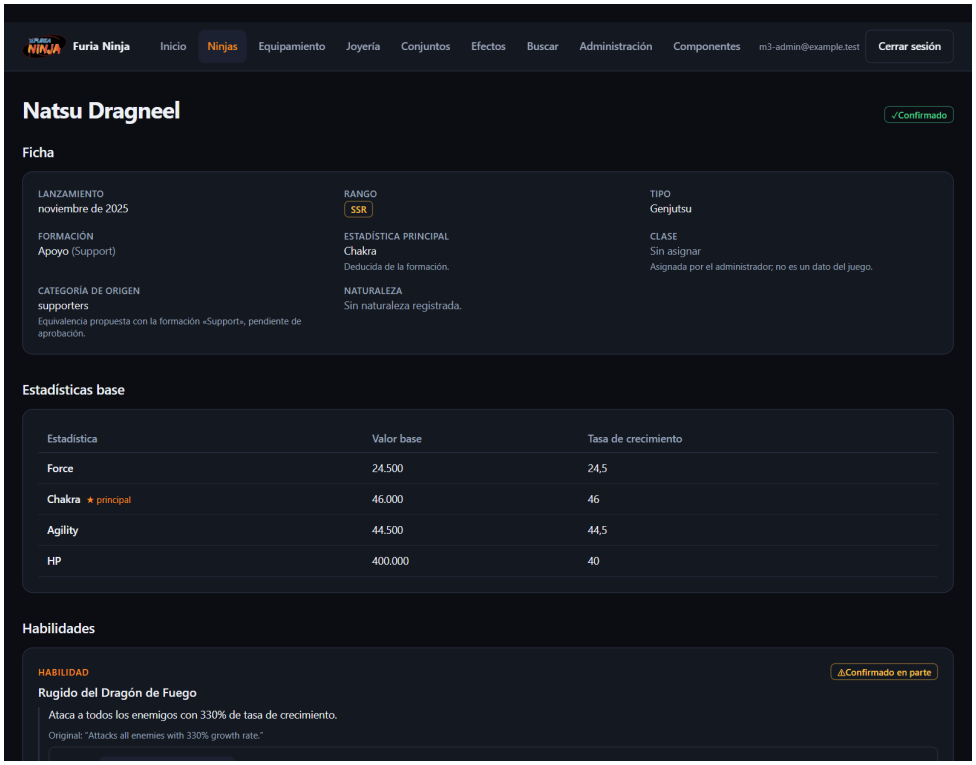

The Supporters in the ninja list

83 ninjas with the Support formation, newest first. The new Supporters are in the list.

Natsu Dragneel

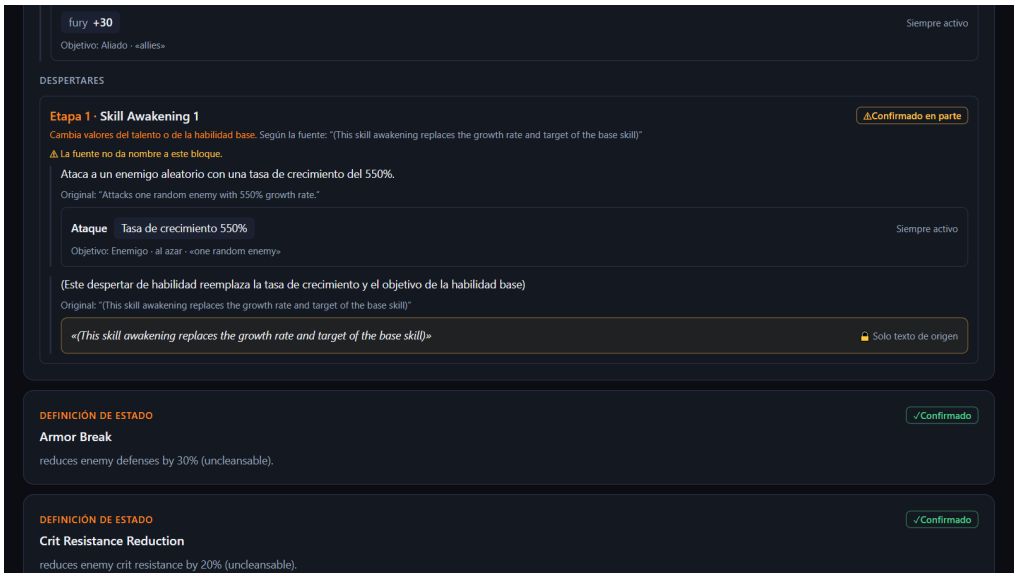

The card statistics, the base skill and the talent are shown with the source line next to each effect.

Rank SSR, four attributes with growth rates, base skill.

Skill awakening replaces target and growth rate

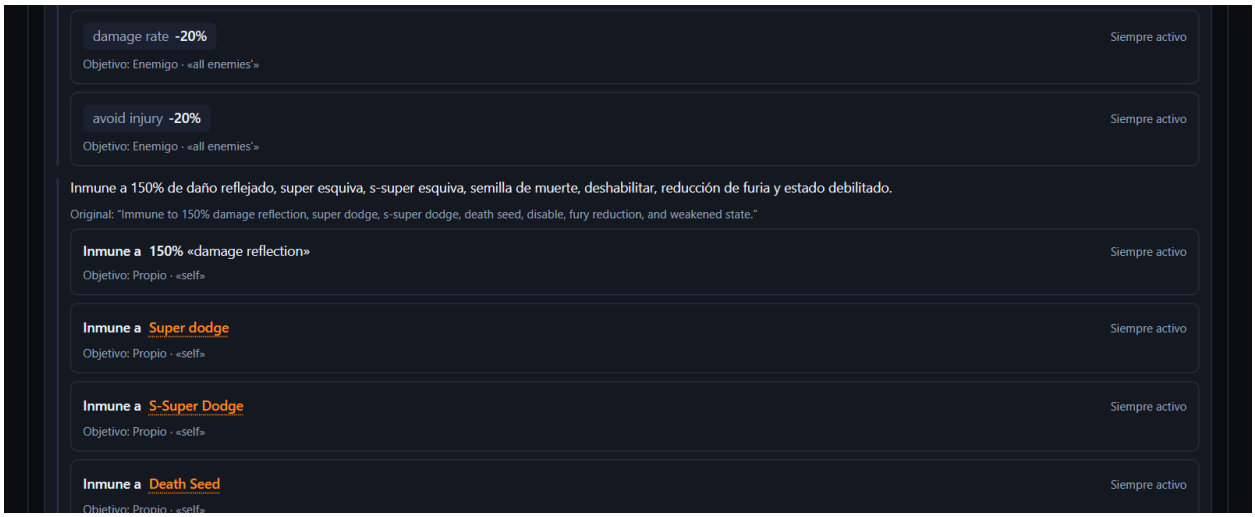

The awakening says it replaces the growth rate and the target of the base skill. The page shows that statement and keeps the base effect as it was.

Skill awakening 1: one random enemy at 550%. The two status definitions (Armor Break, Crit Resistance Reduction) are kept as text.

Talent level 2 replaces level 1

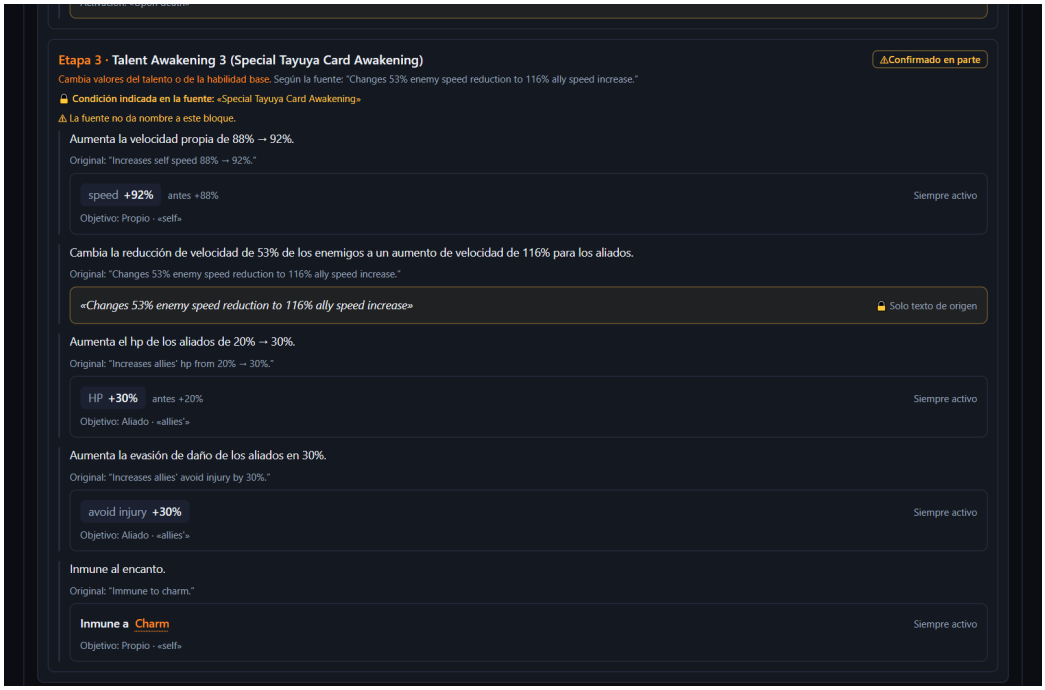

The rule is quoted from the source.

Stage 2: Fire Dragon's Talon, replacing the effects of stage 1.

Cursed Tayuya

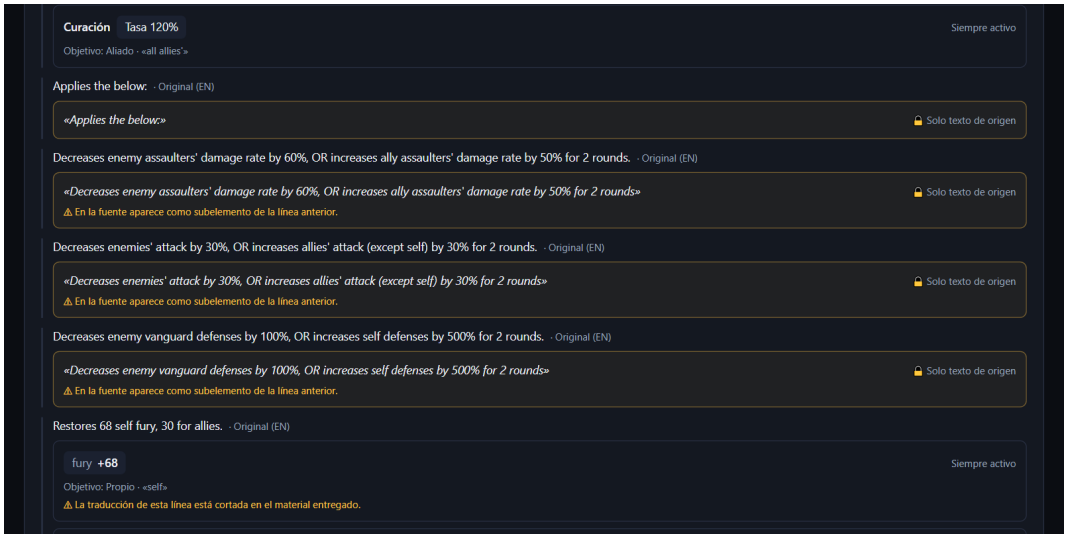

Stage 3 is the special card awakening. It restates speed 88% to 92% and the other values. They replace the base values and are not added to them.

Stage 3 with its condition and the replaced values.

Kimono Kurenai

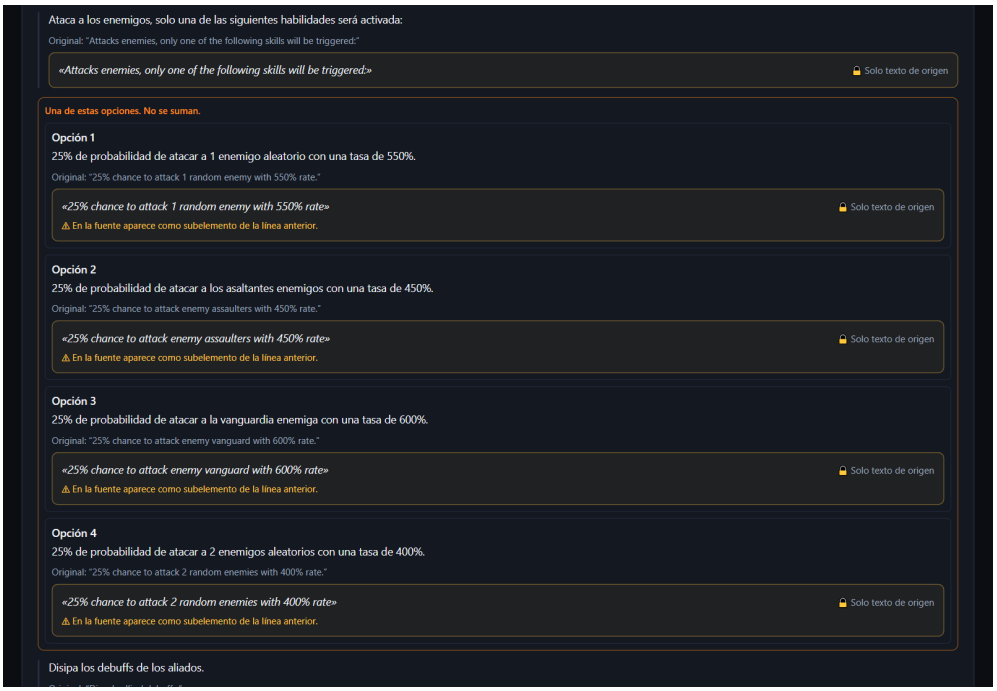

Her skill gives three choices, each written as 'A, OR B'. They are kept as printed text and flagged, so the page never applies both sides. The Spanish text you sent stops after the third choice, so the last Spanish line is missing and marked.

The three OR lines in the skill.

Otsutsuki Isshiki

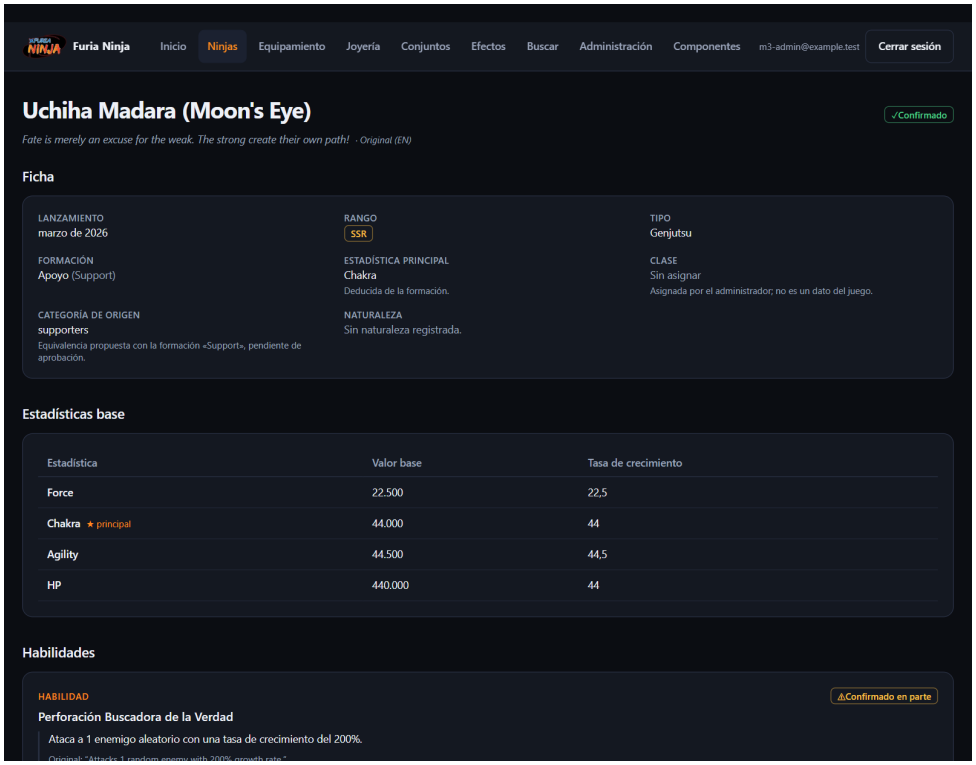

Big Box Sky triggers only one of four attacks, 25% each. It is shown as one group of four options, not four hits.

Four options, each 25%.

Madara (Moon's Eye)

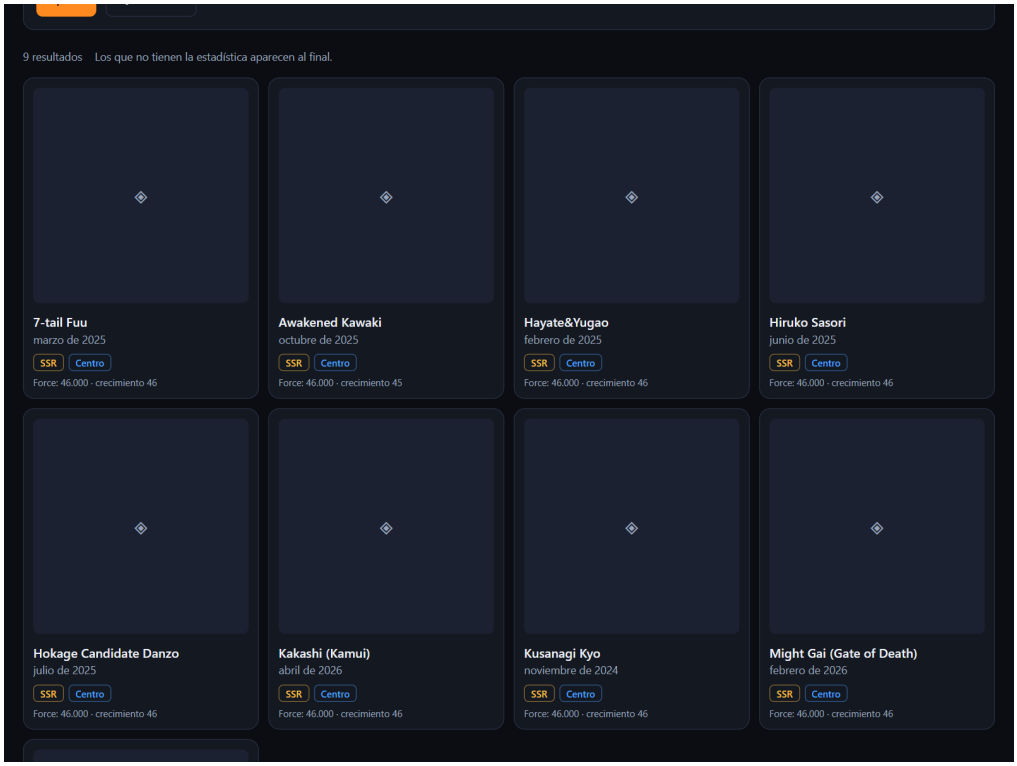

One record. The card statistics, the description from the card and now the ability text and the awakening.

Rank SSR, Support.

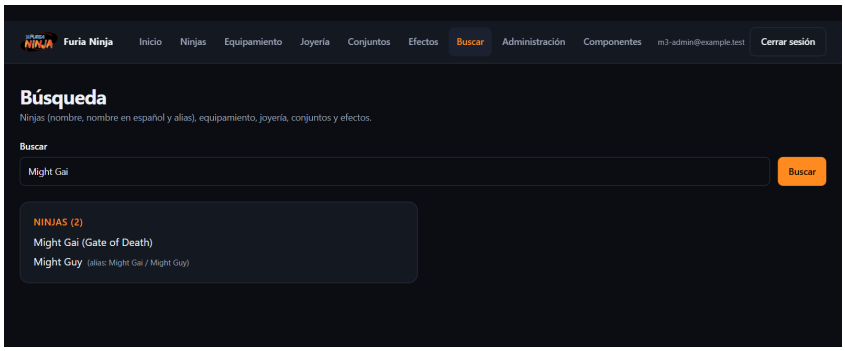

Searching and filtering

Rank and formation filters work together and the list can be sorted by any statistic. Searching a name or an alias finds the ninja.

Nine results for rank SSR and Center, sorted by Force from highest to lowest.

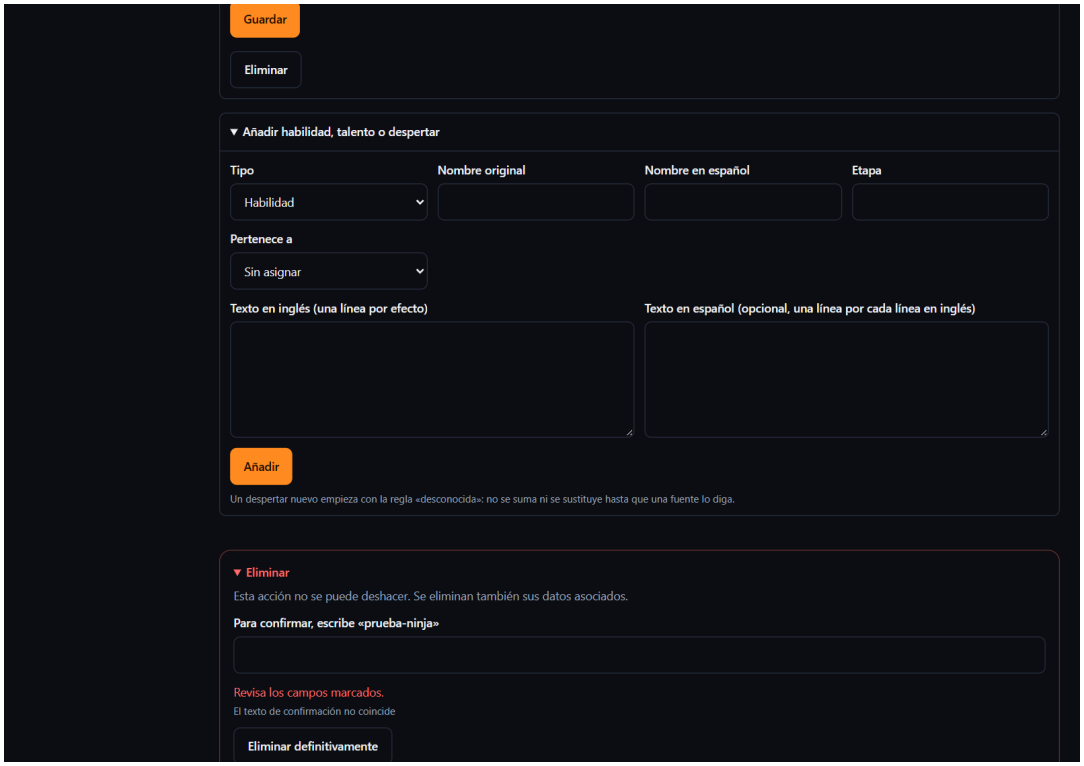

Searching by another name

Global search shows which name matched.

Editing a ninja

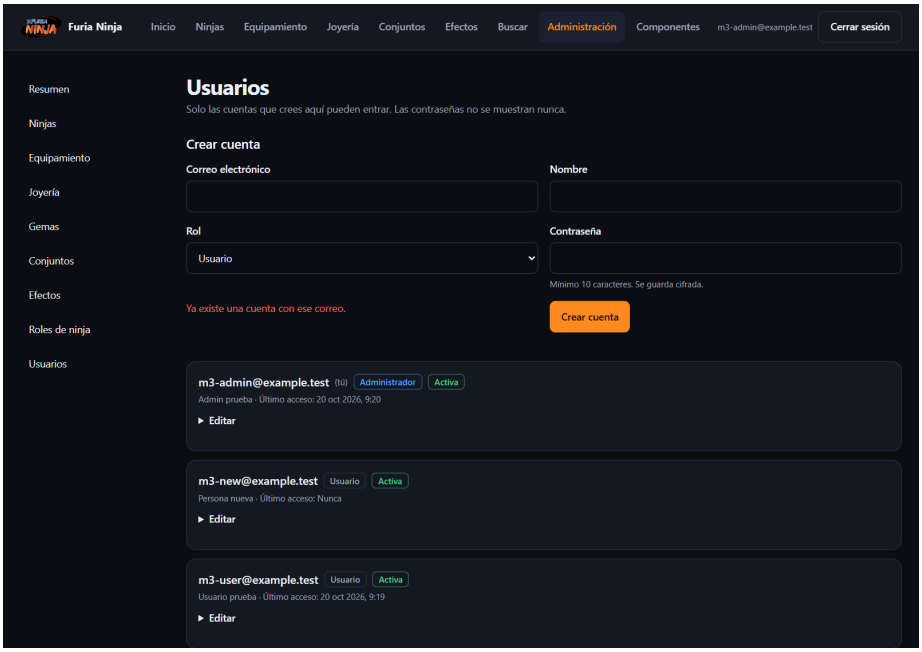

Names, rank, formation, type, base statistics, other names and the text of talents, skills and awakenings. A new awakening starts with stacking unknown.

Administrator edit page.

User accounts

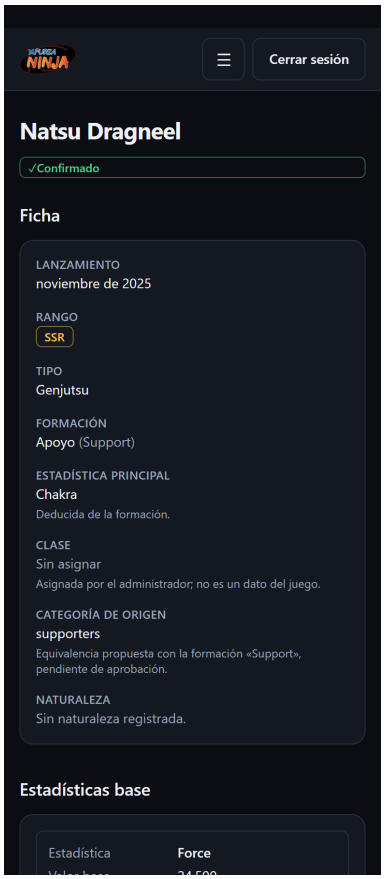

Create accounts, change roles, reset passwords. You cannot remove your own administrator access, and one active administrator always remains.

Account management.

On a phone

The ninja list and Natsu Dragneel at 390 px width. No page scrolls sideways.

Testing summary

Check	Result
Automated tests	252 tests, all passing
Real browser run on the built application	111 checks, all passing, including the new Supporter pages and a 390 px width check
Type check, style check, production build	clean
Data import	dry run on a copy, real run, second run changes nothing
Database integrity	correct, no duplicate ninja
Test data used in the browser run	created and removed afterwards; none remains

What is still open

Item	Situation
Kimono Kurenai, last Spanish skill line	Missing in the text you sent. Shown in English until you send it or approve the English fallback
Cards for Might Guy and Sasuke (Taka)	Not supplied. The file sent as Might Gai's card is a copy of another ninja's card
Spanish for Guren and Final Sasuke	Not supplied
Equipment, jewelry, gems	No material received. Nothing was invented
Four unidentified characters	Illusion God Itachi, Nagato Uzumaki, Immortal Madara and Neji Hyuga (old entry). No evidence in the files, so no ninja was created for them
English and Spanish differences	27 ninjas have lines where the two texts differ. Both are kept, English is the original
Texts and card labels	The 63 texts are transcriptions. Chinese labels on 16 cards were read from small images and are not translated

Questions for you

#	Question
1	Are the six name matches above right?
2	Mitarashi Anko's HP is printed as 45000 on the card. Is that the real value? We stored it as printed.
3	Shikamaru Nara: the card says Explosive Shadow Stab and the text says Shadow Fang. Which is right?
4	Please send the missing Spanish line for Kimono Kurenai.
5	Who are the four unidentified characters? And is Shodai Hokage the First Hokage?
6	Do other awakenings add up, replace or cancel each other? Until you tell us they are never added together.
7	Which text is right where English and Spanish differ?
