# Furia Ninja

## Milestone 4 review report: data completion, corrections, responsive layout and testing

Delivered for client review. Milestone 4 is not closed until you have reviewed and accepted it.

### Where Milestone 4 stands

Milestone 4 completes the first version: the data, the Spanish content, the layout on every screen size, the testing, and the preparation to go live. All the development that can be done from the material you sent is finished and tested. The remaining items need material or answers from you, or the go-ahead to put the site online.

| Agreed deliverable | Where it stands |
|---|---|
| Complete the initial ninja data | Done for everything supplied: 177 ninjas, all 79 Supporter cards, 175 full character cards, English text for every ninja |
| Complete equipment, jewelry and gem data | Waiting for your source material. The screens, search, filters and administration are ready. Nothing was invented |
| Review the data for consistency | Done: every Supporter card checked again against the original images and texts, with no mismatch |
| Complete the Spanish interface and content | Interface complete. Content: 174 of 177 ninjas fully in Spanish; three wait for Spanish text |
| Responsive on desktop, tablet and mobile | Done. A tablet defect was found and fixed (the menu overflowed at 1024 px) |
| Test navigation, search, filters, sorting, details, administration | Done: 264 automated tests and 165 checks in a real browser, all passing |
| Access levels for you and approved users | Done and tested: only administrators reach the administration |
| Deploy and verify in production | Prepared. It needs your approval and the server details |
| Deliver the source code | In the project repository |

## Your corrections, and how they are applied

| Your decision | What the application does now |
|---|---|
| Each new awakening replaces the previous one | Applied to every talent and skill. A later awakening replaces the earlier one and the page says so. The effects are never added together. 17 awakenings replace, 1 cancels and 3 upgrade a base value |
| Natsu Dragneel | Talent level 2 replaces level 1. The skill awakening changes only the target and growth rate: all enemies 330% becomes one random enemy 550%. The rest of the skill stays |
| Cursed Tayuya | The special awakening replaces the values it restates (speed 88% to 92%, enemy slow replaced by allied speed 116%, ally HP 20% to 30%) and adds avoid injury and charm immunity |
| Kusanagi Kyo, Hinata (Soccer Star), First Hokage, Sage Jugo | Their rules are kept exactly as before |
| Shodai Hokage is the First Hokage | One ninja. Both names find it, and the name is marked as confirmed by you |
| Kimono Kurenai | Her Spanish skill text is now complete, with the last line you sent. The three choices stay mutually exclusive |
| Center = Assaulter, ranks, Power, Chakra, Force, S. Attack, English first | Unchanged and tested again |

## How a replacement looks

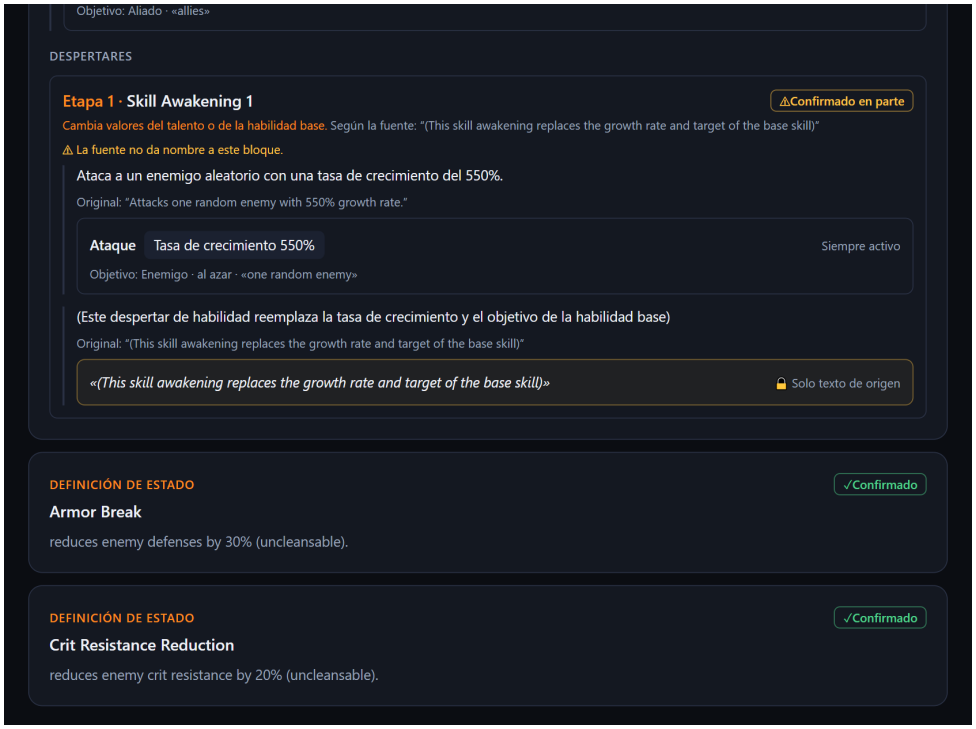

Yamanaka Ino, awakening 2. The page states that it replaces stage 1 and that your decision is the reason.

Stage 2 replaces stage 1; the effects are not added.

## Natsu Dragneel: skill awakening

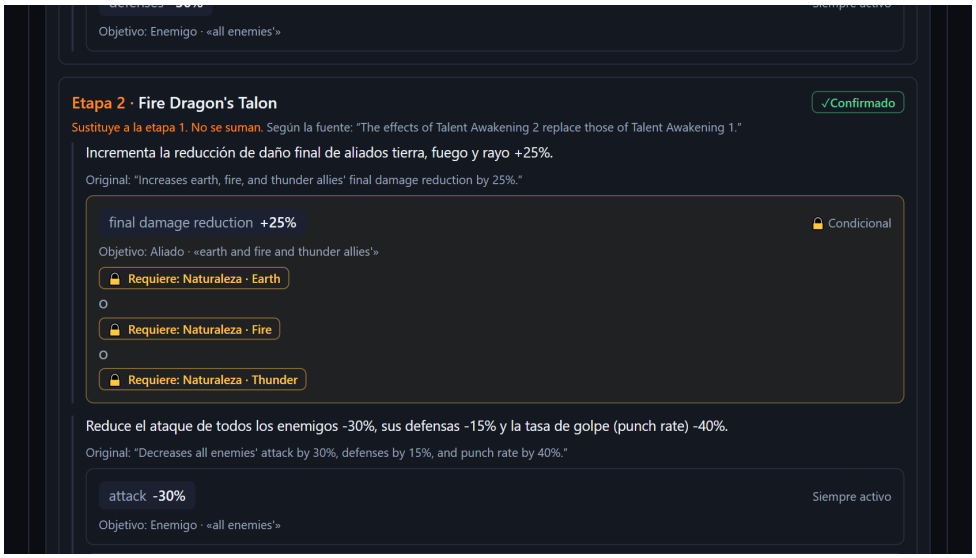

The awakening replaces the target and growth rate of the base skill and nothing else.

Skill awakening 1: one random enemy at 550%.

## Natsu Dragneel: talent level 2

Level 2 replaces level 1; the source line is quoted.

Stage 2: Fire Dragon's Talon.

## Cursed Tayuya

Stage 3 restates base values. They replace the old values and are not added to them.

Special awakening with its condition and the replaced values.

## Kimono Kurenai: complete Spanish

The three choices (A or B) stay alternatives. Her Spanish text now ends with the fury line you sent.

The three choices, with the Spanish text complete.

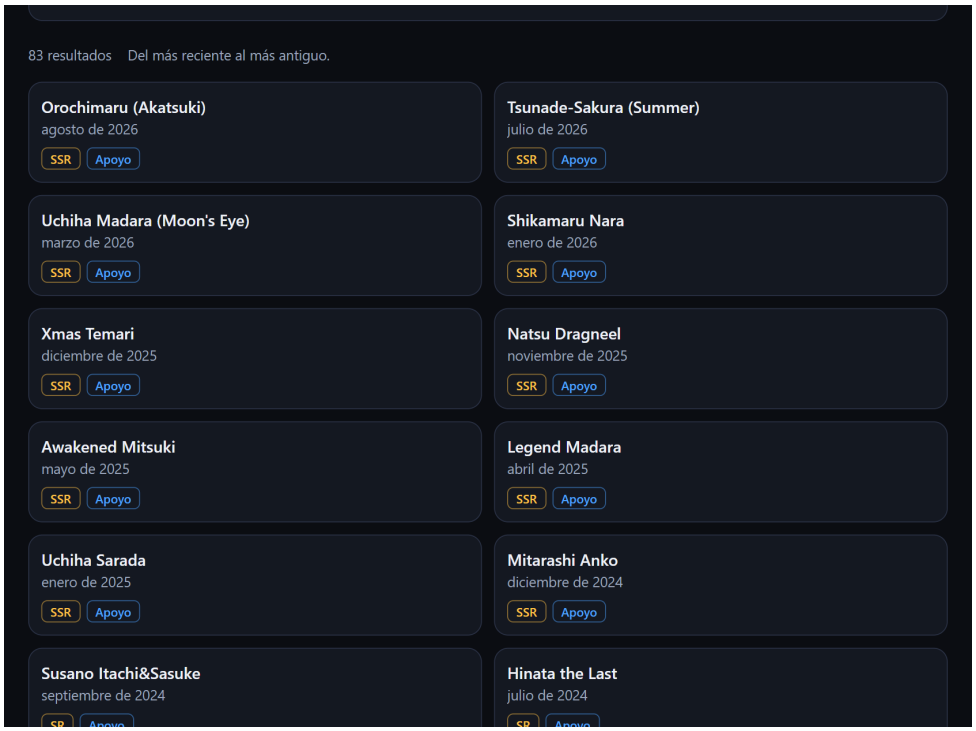

## The data

| Measure | Value |
|---|---|
| Ninjas in the application | 177 (none duplicated) |
| Supporter cards | 79, each linked to one ninja |
| Full character cards | 175 (Might Guy and Sasuke (Taka) still have no card) |
| English ability text | 177 ninjas |
| Spanish ability text | 174 complete, 1 partial (Sai), 2 without (Guren, Final Sasuke) |
| Awakenings | 120 levels on 92 ninjas |
| Equipment, jewelry, gems | 0 (no material supplied) |

Every Supporter card was compared again with the original card image and the original text: rating, formation, type, the four attributes and their growth, talent and skill names, English and Spanish lines, awakening levels. No mismatch was found. Three cards print an HP with five digits (Mitarashi Anko 45000, Uchiha Hikari 46000, Otsutsuki Isshiki 38000); we kept them exactly as printed.

## The Supporters in the ninja list

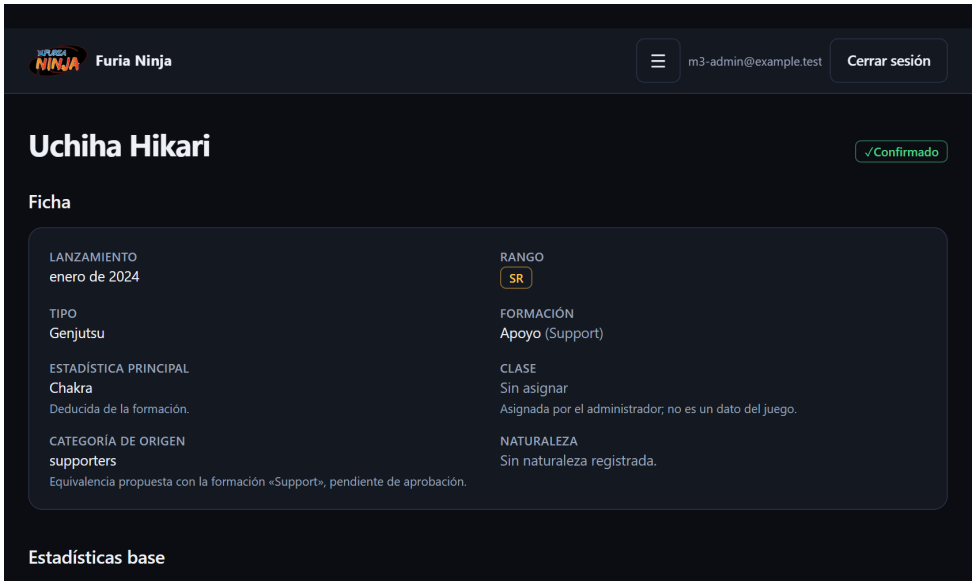

The Support formation lists 83 ninjas: the 79 Supporters plus 4 Alien cards that also print Support.

Newest first.

## A card that prints a five digit HP

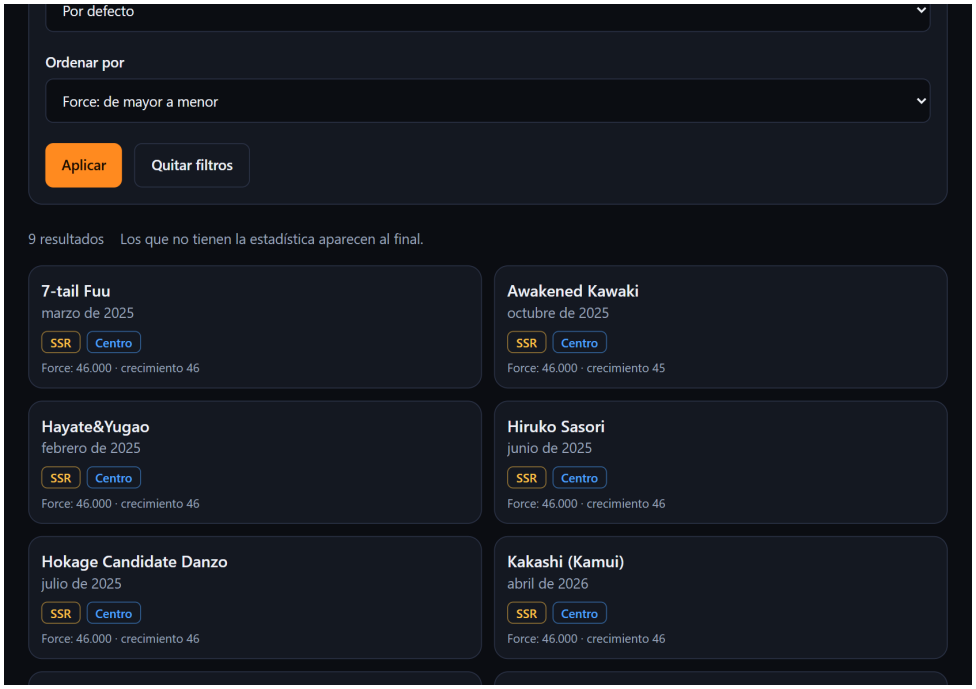

Uchiha Hikari: HP 46000 as printed.

Stored as printed and marked for your confirmation.

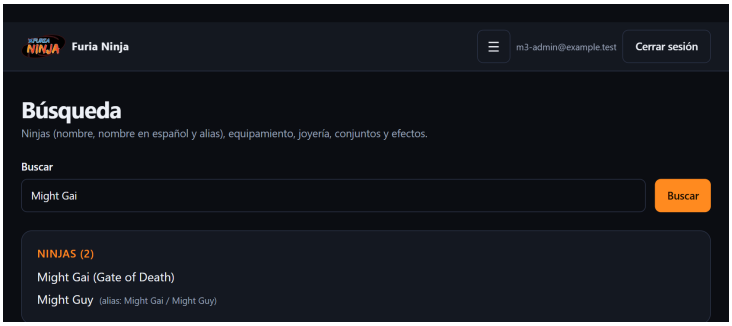

## Search, filters and sorting

Rank, formation, type, category and statistic ranges work together, and the list sorts by any statistic.

Nine results for rank SSR and Center, sorted by Force from highest to lowest.

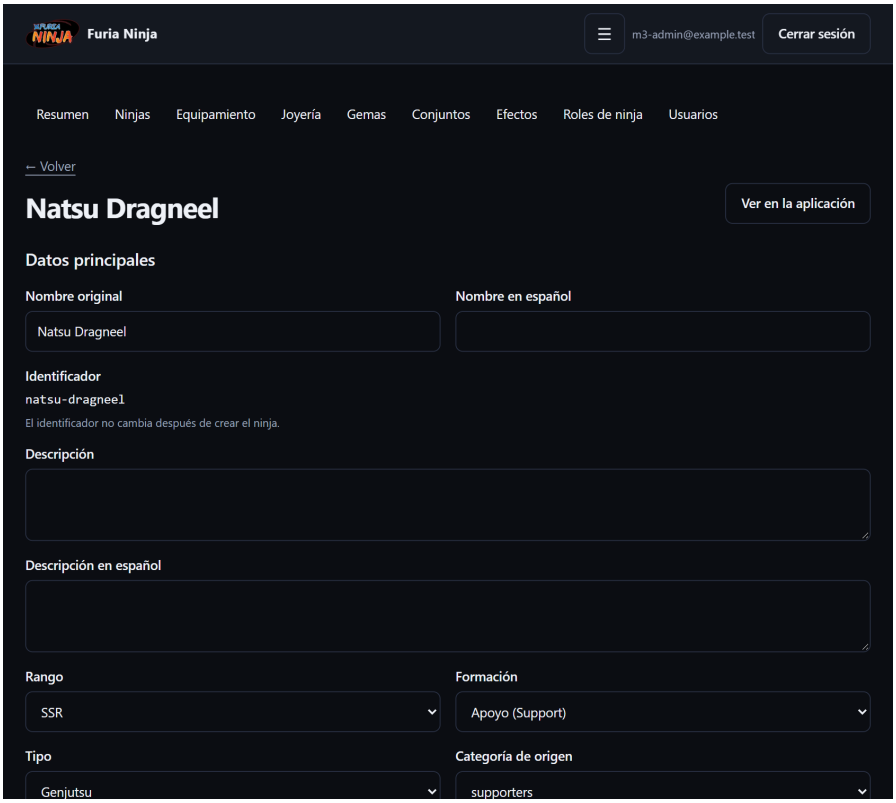

## Searching by another name

Global search shows which name matched.

## Administration: editing a ninja

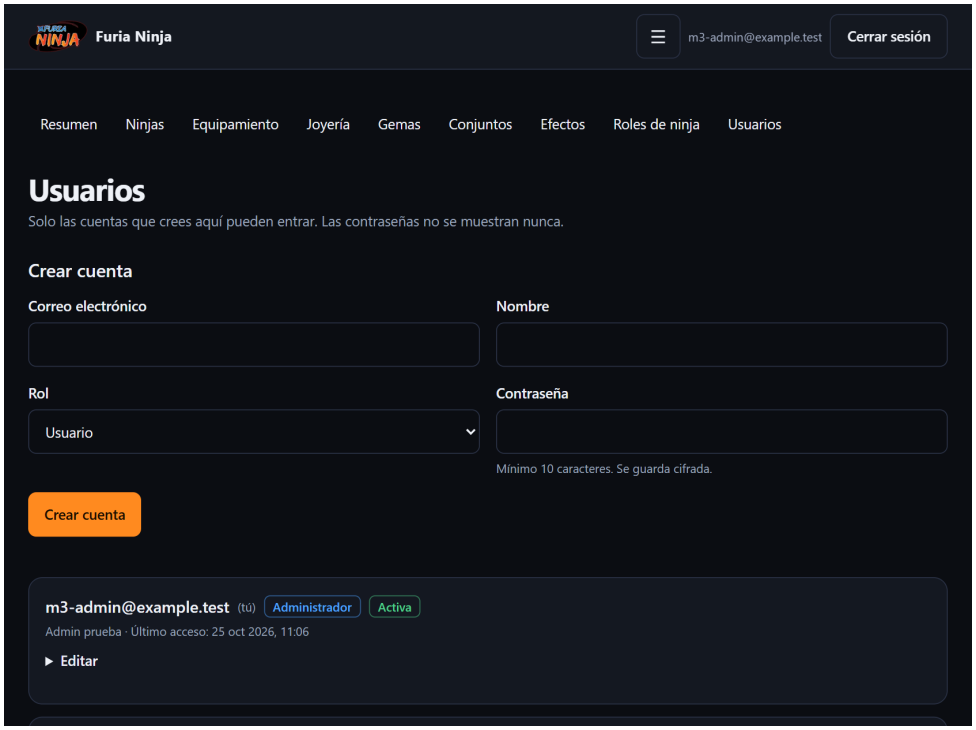

Names, rank, formation, type, statistics, other names, and the text of talents, skills and awakenings. A new awakening follows the replacement rule.

The administrator edit page.

## User accounts

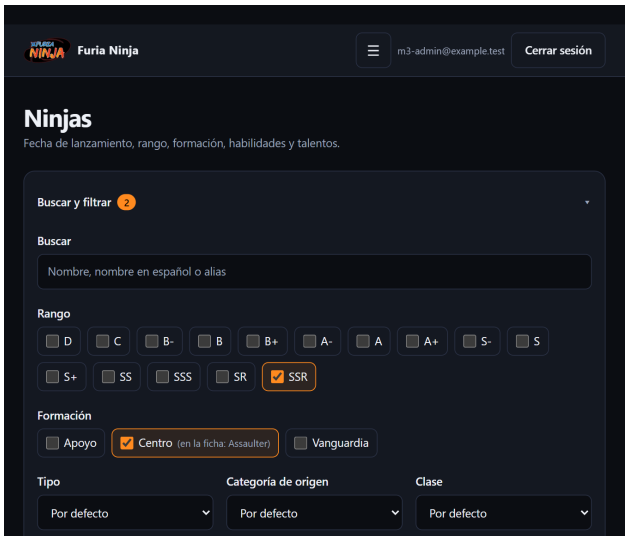

Create accounts, change roles, reset passwords. You cannot remove your own administrator access, and one active administrator always remains.

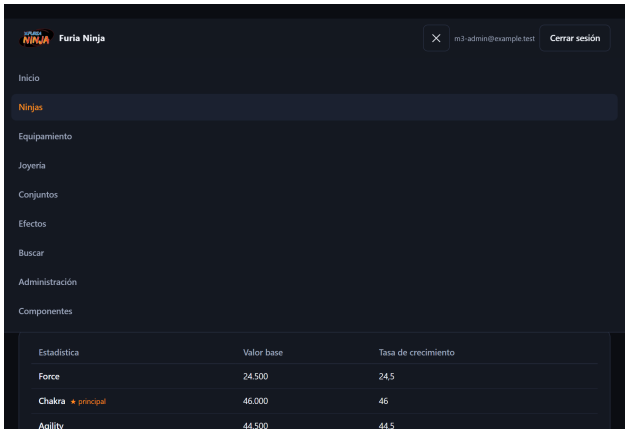

Account management.

## Desktop, tablet and phone

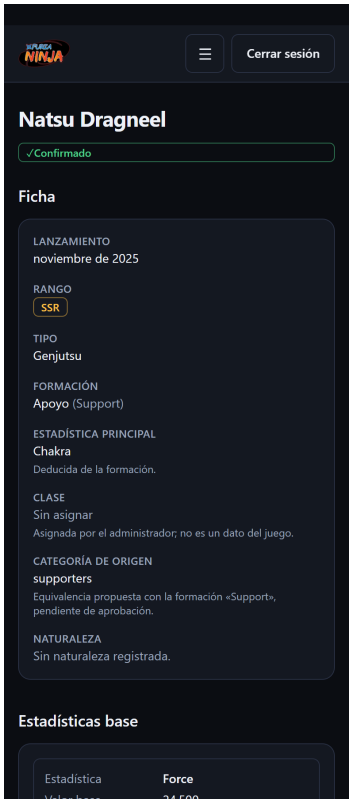

Every main page was checked at 360, 390, 768, 1024 and 1280 px wide, with no sideways scrolling. The tablet check found that the menu was too wide at 1024 px; from now on the menu button takes over below 1280 px.

Left: the ninja list on a tablet (768 px). Right: the menu on a small laptop or tablet (1024 px).

The ninja list and Natsu Dragneel on a phone (390 px).

## Testing and access levels

| Check | Result |
|---|---|
| Automated tests | 264 tests, all passing |
| Real browser run on the built application | 165 checks, all passing |
| What the browser run covers | sign-in, search, combined filters, sorting, ninja pages and awakenings, administration, accounts, phone, tablet and desktop widths |
| Access levels | A visitor who is not signed in cannot open the administration. A regular user gets a page-not-found answer on every administration page and cannot change anything. Gems stay hidden |
| Type check, style check, production build | clean |
| Database | no duplicate ninja; integrity and relationships correct; repeating the import changes nothing |
| Health check for the live site | a small address that confirms the application reaches its database, without showing any data |

## What is still open

| Item | What we need |
|---|---|
| Equipment, jewelry and gems | Your source material. Nothing was invented |
| Cards for Might Guy and Sasuke (Taka) | The two cards (the file sent as Might Gai's card is a copy of another card) |
| Spanish for Guren, Final Sasuke and the end of Sai's text | The Spanish text or the screenshots |
| Nagato Uzumaki | The screenshots for its rating and position |
| Putting the site online | Your approval and the server details |

## Questions for you

| # | Question |
|---|---|
| 1 | Illusion God Itachi is the same character as which ninja (Susanoo Itachi, Reanimated Itachi, Yasaka Itachi or another)? |
| 2 | Who are Neji Hyuga (old entry) and Immortal Madara? |
| 3 | Are the six name matches right? Uchiha Sakura = Sakura Uchiha, 6-tail Utakata = Utakata, Terumi Mei (Summer) = Terumi Mei, Neji Hyuga = Hyuga Neji, Orochimaru (New Era) = Orochimaru from Boruto, Susanoo Itachi & Sasuke = Susano Itachi&Sasuke.; |
| 4 | Are the HP values 45000, 46000 and 38000 on three cards correct, or is a digit missing? |
| 5 | Shikamaru Nara: is the skill Explosive Shadow Stab (card) or Shadow Fang (text)? |
| 6 | Does the first awakening of a talent or skill add to the base, or replace part of it? Until you tell us, it is shown separately. |

## Client review and acceptance

| Review item | Reviewed | Comments |
|---|---|---|
| Your corrections (awakenings, Shodai Hokage, Kimono Kurenai) | | |
| Supporter cards and text | | |
| Search, filters and sorting | | |
| Administration and user accounts | | |
| Tablet and phone layout | | |
| Spanish interface and content | | |
